

REAGENT SET

For manual ¹⁷⁷Lu Labeling of targeting molecules

Reagent set for manual ^{177}Lu Labeling

An attractive and cost-effective solution for easy and convenient preparation of ^{177}Lu labeled targeting molecules.

The Reagent Set includes all necessary items* for manual labeling: Reagents, filters, syringes and needles. With our ready-to-use Reagent Set the labeling of various targeting molecules (e.g. PSMA, DOTATOC) is easy and cost saving and requires only a few minutes. The Reagent Set is produced under GMP conditions according to the ICH Q7 and is designed for EndolucinBeta® (n.c.a. ^{177}Lu chloride) activities of up to 40 GBq.

KEY ADVANTAGES

- Time and cost saving
- Easy and convenient
- Ready to use chemicals
- Labeling instructions upon request

* Targeting molecule not included

About the ITM Group

ITM, a leading radiopharmaceutical biotech company, is dedicated to providing a new generation of radiomolecular precision therapeutics and diagnostics for hard-to-treat tumors. We aim to meet the needs of cancer patients, clinicians and our partners through excellence in development, production and global supply. With improved patient benefit as the driving principle for all we do, ITM advances a broad precision oncology pipeline, including two phase III studies, combining the company's high-quality radioisotopes with a range of targeting molecules. By leveraging our nearly two decades of pioneering radiopharma expertise, central industry position and established global network, ITM strives to provide patients with more effective targeted treatment to improve clinical outcome and quality of life.
